- Microsoft 365 & Azure licensing
- Cloud migration & hybrid cloud
- Cloud backup & cost optimization
- Software licensing & renewals
- Analytics: Alteryx & Power BI

---

### Microsoft Security

**Identity & Access  
Management · Microsoft  
Defender · Microsoft Security**

03

## Cybersecurity & AI

- Network & endpoint security
- Partner-delivered threat detection
- Penetration testing
- Private AI infrastructure

04

## AV & Collaboration

- Meeting rooms
- Video conferencing
- Interactive displays
- Wireless presentation

# We run and support your IT under clear SLAs

## SLA-based

Support layer · remote and onsite

- Service desk
- Staff augmentation
- Preventive maintenance
- Multi-vendor support
- 24/7 coverage available subject to agreed scope, SLA and contract

| Managed service            | What it covers                                                    |
|----------------------------|-------------------------------------------------------------------|
| Managed Infrastructure     | Data center, servers, storage and networks · SLA-based management |
| Managed Backup & DR        | Immutable backups · Replication · Tested recovery                 |
| Managed Microsoft Security | Identity & Access Management · Microsoft Defender                 |
| Managed Cybersecurity      | Network & endpoint security · Partner-delivered monitoring        |
| Managed Device Lifecycle   | Supply → Image → Asset Tag → Deploy → Manage → Support → Refresh  |

# Protect. Recover. Keep AI inside.

## Protect

---

- Network and endpoint security
- Partner-delivered threat detection & monitoring
- Security assessments aligned with NCA ECC requirements
- Penetration testing

## Recover

---

- Immutable backups
- Replication
- Tested recovery for critical systems

## Private AI

---

- 1 **AI Readiness Assessment**
- 2 **Private AI Infrastructure**
- 3 **Deployment**
- 4 **Support**

Sensitive data stays inside the organization

# From understanding to continuous improvement

# Sectors we serve, led by banking

KEY SEGMENT

## Banking & Finance

Secure, compliant infrastructure for banks and financial institutions.

### Government

Reliable IT for government entities, aligned with national standards.

### Healthcare

Dependable systems for hospitals and healthcare providers.

### Enterprise & Telecom

Scalable IT for large enterprises, operators and service companies.

# Built on excellence. Creating value.

## From supply to lifecycle

We don't stop at delivery: Supply → Image → Asset Tag → Deploy → Manage → Support → Refresh.

01

### One accountable partner

Supply, implementation, licensing and support under one contract.

02

### Proven with banks

Trusted by leading Saudi banks with demanding security requirements.

03

### Certified people

Technical teams certified on the products and services they deliver.

04

### Long-term support

Maintenance, renewals and expansion handled for you.

05

### Logistics built in

Warehousing, kitting, imaging and asset tagging before every rollout.

06

### Kingdom-wide reach

Offices in Jeddah and Riyadh, nationwide delivery and installation.

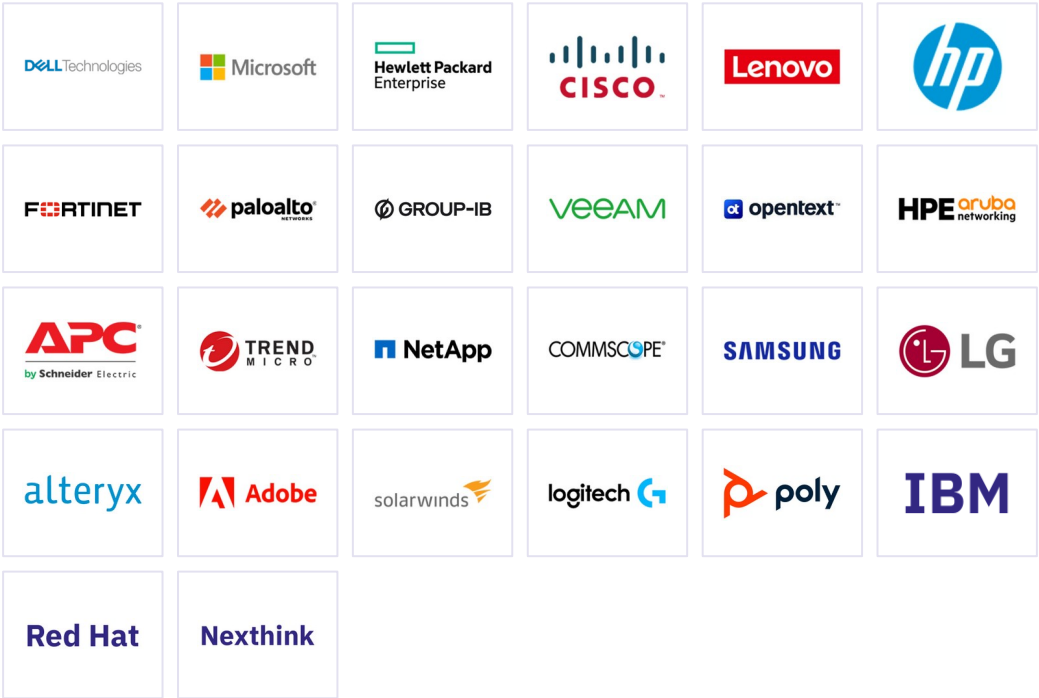

# Trusted by leading Saudi banks and enterprises

## Our clients

## Technologies we work with

SAUDI VISION 2030

# Supporting the Kingdom's digital transformation

## 01 Digital transformation

Helping banking, finance, health and government organizations stay competitive.

## 02 Technology resilience

Keeping organizations technologically sound.

## 03 Local expertise

Building local expertise in every project we deliver.

SAUDI VISION

# 2030
